## **Mitrix to Preview Mitochondrial Bioreactor and Transplantation at Longevity Summit 2023**

Pleasanton, CA, August 9, 2023 - Mitrix Bio Inc. Chief Medical Advisor, Stanford surgeon Dr. Vinit Mahajan, will be speaking at the Longevity Summit conference August 18<sup>th</sup> in Dublin, Ireland. He will preview revolutionary new technology from Mitrix: a preclinical treatment which transplants bioreactor-grown mitochondria into the human body to regenerate organs and reverse disease.

These technologies are currently planned to enter early human trials in 2024.

### About Mitrix Bio Inc.

Mitrix Bio ([www.mitrix.bio](http://www.mitrix.bio)) is a Pleasanton, CA-based preclinical biotech startup developing mitochondrial bioreactor transplantation therapeutics. It was founded by Tom Benson, a former manager at Stanford Linear Accelerator National Lab, with advisors such as Dr. Michael Snyder, Chair of the Genetics Department at Stanford University, Dr. Thomas Rando, Director of the UCLA Broad Stem Cell Research Center and former director of the Glenn Center for the Biology of Aging at Stanford University. Visit [www.mitrix.bio](http://www.mitrix.bio) for more information.

### Disclaimer

The treatments discussed in this document are purely experimental, not yet tested in human patients, and not available for human use.
